Webinar Technology Transfer model of Czech Republic

Czech Republic is one of the most active European economies in R&D, they invest 1,68% of GDP, which is the most in CEE region. Due to, the environment in R&D composed by public universities, research organizations, private companies, hubs and research centers and Stakeholders. In the last two years Czech-Colombian dialogue on RDI has been intensive. This Webinar is addressed to Colombian universities and researchers to know best practices in technology transfer and support of innovations from R&D Czech environment actors. The Colombian universities will be able to see several models and send their questions to the Czech institutions.
